

Mr. Felipe López Montes, born on 8th October 1998, citizen of Spain,

was fully-employed from 6th May 2021 until 31st October 2021, primarily working on the development and maintenance of web-service oriented applications.

In Strategic Thinking, we are dedicated to enhancing customer success in the digital world through a wide range of specialized digital services. Our focus is on creating custom digital manuals designed to streamline the internal processes and ensure efficient knowledge transfer. Additionally, we offer solutions for the digitization of existing manuals, converting physical documents into interactive and easily accessible digital files.

In his role as a Full Stack web developer, Felipe was responsible for the following tasks:

- ☐ Development and maintenance of Full Stack projects with Vanilla JS, HTML and CSS.
- ☐ Fixing bugs that may appear in production environments.
- ☐ Writing of technical documentation for the projects.
- ☐ Keeping version control with GitHub.

I had the pleasure of supervising Felipe during the second semester of 2021 and was impressed by his professionalism. Felipe's proactive nature, combined with a solid knowledge base, ensures he consistently meets his tasks.

When he needs to learn something, he picks it up quickly on the fly. His excellent communication skills, speed, and meticulous version control make him invaluable in fast-paced environments. I wholeheartedly recommend Felipe to any team or organization seeking a dedicated and proficient professional.

Unfortunately, Felipe had to prioritize his studies in his Erasmus program in Portugal, and as a result, we were compelled to terminate our contractual agreement due to a scheduling conflict that was affecting his ability to maintain his grades.

Vigo, November 1st, 2021

Fernando Gómez Quintela
