PROFESSIONAL EXPERIENCE

Aircury. Full-stack web developer. 08/2022 – 10/2023 (Remote)

I worked for a UK-based customer (CEC) in the **UK education sector**, following Agile **SCRUM** and using **JIRA** for task management. My role involved developing the tasks required by the customer within each sprint while adhering to best practices such as **TDD** and **BDD** methodologies.

These tasks included **full-stack** development, such as creating new features, sections, and more on various web applications, using **ReactJS** and **PHP-Symfony**, as well as database management with **Doctrine** and **PostgreSQL**.

Additionally, **code reviews** were conducted for my teammates' tickets as well as collaboration with our **support** and **testing** teams, ensuring quality and consistency throughout the company's workflow. In addition, I also implemented automated tasks and pipelines in **Jenkins** for data integration from external platforms.

We worked with **Docker** environments running on **AWS**, along with **Kubernetes** for container orchestration and management, and **Jenkins** for automating the deployment process. Version control was conducted with **GitHub**.

Strategic Thinking. Full-stack web developer. 05/2021 – 12/2021 (Remote)

Full-stack development using **Vanilla JS**, **HTML** and **CSS**, using **Google Firebase Firestore Database** and **Materialize.css**. Co-founder of https://anetva2021.web.app/. and maintenance of https://totalhse.web.app/

University of Vigo. Intern. 02/2020 – 08/2020 (Ourense, Spain)

I carried out maintenance tasks and managed a computer space for study and learning through ICTs. Constantly dealing with students and employees who needed help with both computer and printer problems.

MQL5.COM. Freelancer. 12/2019 – 12/2020 (Remote)

Development of operational scripts in Forex markets, based on technical market indicators. Direct contact with customers.

Banco Santander. Bank clerk. 07/2018 – 08/2018 (Bilbao, Spain)
