

# Felipe López Montes

SWE & Database Technical Lead

# PostgreSQL, Symfony, ReactJS, SQL, TDD, Docker, Kubernetes, Jenkins, JIRA.

# PHP, AWS, AWS ECS, AWS Lambda, AWS RDS, SCRUM.

Software engineer with wide experience in web and data integration development, both backend and frontend. Passionate about sport, nature and coding. With objectives, among others, to achieve stability within a company in which I can put my skills into practice, as well as being able to carry out different projects in which to focus my motivation.

## PROFESSIONAL EXPERIENCE

### Aircury. Database Technical Lead. 10/2025 – Now (Hybrid)

**Define** and **oversee** database **standards** covering schema design, migrations, access control, backups, recovery, maintenance, monitoring and performance. Promote **safe database change practices** to reduce production risk and operational debt, while monitoring critical risks, capacity, **query performance** and recovery readiness.

**Support teams** with **complex database diagnostics** and decisions around persistence, indexing and operational safeguards, strengthening recovery confidence through documented **procedures**, backup discipline and periodic restore validation.

### Aircury. ETL Developer. 03/2024 – 10/2025 (Remote)

**Data analysis and integration** using **PHP-Symfony** and **PostgreSQL**, connecting platforms such as **Salesforce** and the UK Department for Education —**DfE**— API to download, process and transmit information efficiently, balancing technical quality with development timelines.

**Database administration and optimisation** through query improvement, bottleneck resolution, permissions management and data normalisation. **Deployment management** and monitoring of integrations on **AWS**, maintaining direct communication with the client and using Git and GitHub for version control.

### Aircury. Full-stack Web Developer. 08/2022–10/2023 (Remote)

I worked with the **CEC**, a UK-based client in the education sector, within an agile **SCRUM** environment managed through **JIRA**. I contributed to the **full-stack development** of web applications using **ReactJS** and **PHP-Symfony**, implementing features, services and improvements while following best practices such as **TDD** and **BDD**.

I also worked on data management with **Doctrine** and **PostgreSQL**, integrations with **Salesforce** and external **APIs**, code reviews, and collaboration with Support and QA teams. The technical environment included **Docker** on **AWS**, **Kubernetes**, **Jenkins** for deployments and data integration, and **GitHub** for version control.

### Strategic Thinking. Full-stack Web Developer. 05/2021 – 12/2021 (Remote)

**Full-stack** development using **Vanilla JS**, **HTML** and **CSS**, using **Google Firebase Firestore Database** and **Materialize.css**. Co-founder of <https://anetva2021.web.app/>. and maintenance of <https://totalhse.web.app/>

## LANGUAGES

English: Professional (**C1**)  
French: Intermediate (**B2**)  
Spanish: Native  
Galician: Native

## EDUCATION

10/2023-12/2023

### Data Science Bootcamp

Le Wagon, Zürich  
(Python, SQL, Jupyter, Matplotlib, Pandas, Scikit-Learn, TensorFlow, Google Compute, Hugging Face, MLflow, EastAPI, ChatGPT)

2016-2022

### Bachelor in Computer Engineering

University of Vigo

2016-2022

### Bachelor in Business Administration

University of Vigo
